SUMMARY

Data Analyst with **2 years of experience in data analysis and reporting** and 1.6 years of prior experience as a Process Executive within Cognizant's client-facing operations. Experienced in analyzing application and operational data, identifying trends and anomalies, performing data validation, preparing performance reports, and generating actionable insights. Proficient in **SQL, Advanced Excel, Power BI, and Python (Pandas)**. Strong ability to work with large datasets, develop KPI reports, perform data cleaning and reconciliation, and communicate analytical findings to stakeholders.

SKILLS

Data Analysis: Data Cleaning, Data Validation, Data Transformation, Exploratory Data Analysis, Trend Analysis, Variance Analysis, Root Cause Analysis, Data Reconciliation

SQL: Joins, GROUP BY, Aggregate Functions, Subqueries, CASE Statements, CTEs, Window Functions, Filtering & Sorting

Excel: Advanced Excel, Pivot Tables, XLOOKUP/VLOOKUP, INDEX-MATCH, IF Functions, Conditional Formatting, Charts, Dashboards, Data Cleaning

Power BI: Data Visualization, Power Query, Data Modeling, DAX, KPI Dashboards, Interactive Reports

Python: Python, Pandas, NumPy, Data Cleaning, Exploratory Data Analysis

Analytics & Reporting: KPI Reporting, Performance Analysis, Trend Identification, Dashboard Development, Business Insights, Operational Reporting

Tools: MS Excel, Power BI, SQL, Python, Jira, Google Workspace, PowerPoint

WORK EXPERIENCE:

Cognizant(Process Executive/Analyst)

(Nov'22- Present)

Client: Google

- Processed and standardized **1,00,000+ records** from multiple regions and **5+ data sources** using **SQL and Advanced Excel**, performing data extraction, cleansing, validation, and reconciliation to support weekly analytics and KPI tracking.
- Designed **Advanced Excel reporting templates** using XLOOKUP/VLOOKUP, Pivot Tables, and dynamic formulas, reducing reporting time by **40% across 4 departments** and improving reporting efficiency.
- Developed and maintained **10+ KPI reports and Power BI dashboards** to monitor productivity, quality, volume, turnaround time, revenue trends, customer mix, and monthly performance.
- Executed **SQL-based data analysis** using joins, aggregations, filtering, and conditional logic to identify trends, anomalies, performance gaps, and patterns across operational datasets.
- Performed **data quality checks, reconciliation, and root-cause analysis** on **20+ recurring data and performance issues**, identifying process gaps and supporting corrective actions to improve report reliability.
- Collaborated with **4 analysts, 2 senior managers, and 8+ stakeholders** to define and validate **6 KPIs**, gather reporting requirements, deliver ad-hoc analysis, and communicate actionable insights for data-driven decision-making.

Client: Google (Customer Operations & Performance Analytics)

- Reviewed and evaluated 500+ applications/content items daily against defined quality, policy, and compliance guidelines, ensuring accurate classification and consistent decision-making.
- Analyzed **10,000+ cases monthly** to identify recurring patterns, exceptions, and quality issues, supporting process improvement and maintaining consistent review standards.
- Maintained **95%+ accuracy and SLA adherence** while handling high-volume review queues, balancing productivity, quality, and turnaround-time requirements.
- Performed **quality checks and root-cause analysis** on review errors and process exceptions, identifying recurring gaps and implementing corrective actions to improve overall output quality.
- Prepared and maintained **daily/weekly performance reports using Excel**, tracking productivity, accuracy, case volume, SLA adherence, and quality metrics for team and management review.

EDUCATION

International School of Management

Bachelor of Business Administration

Jul' 19 -Aug' 22
